Guiding States, Transforming Communities: Developing Effective Prevention Approaches

Prevention Solutions at EDC training and consultation services equip states and communities with the expertise and tools to craft impactful prevention programs. We understand that successful prevention initiatives require collaboration, effective planning, and acquiring new knowledge and skills.

Our services are crafted to empower stakeholders at every level. We foster an environment where knowledge meets practical application through interactive workshops, expert-led seminars, and one-on-one consultations.

Innovative Solutions

We aim to instill confidence and competence, enabling states and communities to identify challenges and devise innovative, tailored solutions proactively. We work alongside stakeholders, encouraging collaboration, harnessing collective wisdom, and refining strategies to meet evolving needs.

By investing in our training and consultation services, states and communities unlock the potential to develop robust, research-informed prevention approaches. We're committed to supporting their journey towards healthier communities and sustainable change.

OUR SERVICES

Consultation Services

We provide various consultation services, including one-on-one support, group consultation, group coaching, communities of practice, and strategic planning services.

Our services are customized and client-centered. Consultation topics include but are not limited to workforce development, prevention science, communication product development, organization/system change, evaluation.

Training Services

Our training educates and empowers communities and states to build effective systems and approaches that result in positive change and outcomes.

Workshops include virtual webinars (1.5 to 2 hours) and in-person training.
